www.reallygreatsite.com

Enthusiastic and self-motivated web developer with a strong foundation in frontend design and development. Passionate about building responsive user interfaces and currently expanding skills in backend technologies. Built a Spotify UI clone and actively working on integrating backend to create full-stack applications.

Independent Web Development Projects

Spotify clone

- Designed a responsive Spotify Clone UI using HTML, CSS, and JavaScript.
- Focused on clean layout structure, dynamic components, and intuitive user interaction.
- Continuously improving project by learning backend development using Node.js and Express.
- Collaborated with online communities (e.g., GitHub, Discord) for feedback and improvements.
- Planning to deploy full-stack version with integrated backend functionality.
